How to use this guide

This guide is designed to be read sequentially for new investors, or used as a reference by navigating directly to the relevant chapter. Each chapter is self-contained. Screenshots reflect the live Cireta Launchpad interface at [launchpad.cireta.com](https://launchpad.cireta.com).

## CHAPTER 01

# Getting Started

Cireta is a regulated platform for investing in tokenized real-world assets — gold, copper, and commodity futures — on the Base blockchain. This chapter explains what you need and how to begin.

## What is Cireta?

A regulated RWA tokenization launchpad that issues ERC-3643 security tokens backed by physical commodities. Every token represents a fractional ownership of a verified real-world asset.

## Base L2 Blockchain

All tokens live on Base — Coinbase's Ethereum Layer 2. Transactions are fast (2s finality), low cost (<\$0.01), and secured by Ethereum's full validator set.

## Regulated & Compliant

Full KYC/AML via Sumsb. On-chain identity via ONCHAINID. Compliance rules enforced at both API and smart-contract level. Your identity is required before investing.

## Prerequisites

### What you need

- ✓ ✓ Valid government-issued photo ID
- ✓ ✓ Proof of address (utility bill / bank statement)
- ✓ ✓ A Base-compatible crypto wallet (MetaMask, Coinbase Wallet, etc.)
- ✓ ✓ USDC on Base for contributions
- ✓ ✓ A modern web browser (Chrome, Firefox, Brave)

### Onboarding Journey

- 1 Create Account**  
Register with email + password at [launchpad.cireta.com](https://launchpad.cireta.com)
- 2 Complete KYC**  
Identity verification via Sumsb (Level 1: ID, Level 2: Address)
- 3 Connect Wallet**  
Add your Base-compatible wallet to your profile
- 4 Explore & Invest**  
Browse tokenized projects and make contributions

### 📌 Regulated Platform Notice

Cireta issues regulated security tokens. All investors must complete identity verification (KYC) before making any investment. Investments may only be made using whitelisted wallet addresses. This is a compliance requirement under applicable securities law, not a platform restriction.

CHAPTER 02

# Creating Your Account

Registration takes under 2 minutes. You will need a valid email address and a secure password.

## Registration Steps

- 1

**Navigate to Registration**  
Go to [launchpad.cireta.com](https://launchpad.cireta.com) and click **Get Started** or **Register** in the top navigation.
- 2

**Enter Your Email**  
Provide a valid email address. This will be your login username and used for important communications.
- 3

**Choose a Strong Password**  
Minimum 12 characters. Use a mix of uppercase, lowercase, numbers, and symbols. Consider using a password manager.
- 4

**Accept Terms & Submit**  
Read and accept the Terms of Service and Privacy Policy, then click **Create Account**.
- 5

**Verify Email (Optional)**  
Check your inbox for a confirmation email. Click the verification link to unlock all platform features.

### ⚠ Password Security

Never share your password. Cireta staff will never ask for it. Use a unique password not used on any other website.

CHAPTER 03

# Logging In & Dashboard

## Signing In

Visit [launchpad.cireta.com/login](https://launchpad.cireta.com/login) and enter your registered email and password. Click **Sign In**. On success you will be redirected to your investor dashboard.

### Session Security

Your session is secured by a short-lived JWT access token (15 minutes) that is automatically refreshed using a 7-day refresh token. You will be logged out automatically after 7 days of inactivity, or if you log in from another device.

## Home Dashboard

After login, the home page shows you:

- Featured tokenized projects
- Your KYC status indicator
- Quick links to explore, invest, and portfolio
- Recent platform announcements
- Market data for active tokens

### Security Notice

Always verify the URL is [launchpad.cireta.com](https://launchpad.cireta.com) before entering credentials. Enable browser bookmarks to avoid phishing sites.

CHAPTER 04

# KYC Verification

Know Your Customer (KYC) verification is a legal requirement for investing in regulated securities. Cireta uses Sumsub, an industry-leading identity verification platform, to process KYC safely and quickly.

## KYC Levels

### Level 1 — Identity

Required to view

Government-issued photo ID (passport, national ID, or driver's licence). Required to browse restricted project details.

### Level 2 — Address

Required to invest

Proof of address: utility bill or bank statement dated within 3 months. Required to make contributions and request redemptions.

## Process Steps

- 1 Start KYC**  
Navigate to Account → KYC Status and click Start Verification.
- 2 Document Upload**  
Upload clear photos of your ID and proof of address via the Sumsub widget.
- 3 Liveness Check**  
Complete a brief selfie/liveness check. Takes ~30 seconds.
- 4 Review (1-24h)**  
Sumsub reviews your submission. You will be notified by email when approved.

### ✓ Your Data is Protected

Your KYC data is encrypted at rest using AES-256 and transmitted over TLS 1.3. Cireta stores only an anonymized reference ID — your full documents are held by Sumsub under their GDPR-compliant data retention policies. You may request deletion at any time.

## CHAPTER 05

# Wallet Setup

Your crypto wallet is the address where your security tokens will be held. You must register at least one wallet before investing. All wallets must be on the Base network.

## Supported Wallets

### MetaMask

The most popular Ethereum-compatible wallet. Install the browser extension from [metamask.io](https://metamask.io). Switch to the Base network in settings.

### Coinbase Wallet

Native support for Base network. Available as mobile app and browser extension. Recommended for beginners.

### WalletConnect Compatible

Any WalletConnect v2 compatible wallet (Rainbow, Trust Wallet, Safe, Ledger Live) is supported.

## Adding a Wallet

1

### Go to Wallets Page

Navigate to Account → Wallets in the sidebar.

2

### Click Add Wallet

Your wallet client will prompt you to sign a connection message.

3

### Sign Message

Sign the Cireta ownership verification message (no gas required).

4

### Set as Primary

Designate one wallet as primary for contributions and token delivery.

### ⚠ Wallet Security

Never enter your seed phrase on any website — including Cireta. Your seed phrase is only needed to recover your wallet locally. Cireta will only ever ask you to sign messages, never to share your private key or seed phrase.

CHAPTER 06

# Exploring Projects

Browse all available tokenized commodity projects on the Explore page. Each project card shows key metrics, the sale status, and the issuer details.

## Project Card Information

| Field             | Description                                  |
|-------------------|----------------------------------------------|
| Token Name        | The security token name and ticker symbol    |
| Asset Type        | Commodity (gold, copper) or futures contract |
| Issuer            | The regulated entity issuing the token       |
| Sale Status       | Upcoming / Active / Closed / Finalized       |
| Target Raise      | Total capital the issuer is seeking          |
| Token Price       | Price per token in USDC                      |
| Min. Contribution | Minimum investment amount                    |

## Filtering & Search

Use the filter bar to narrow projects by:

- Asset type (commodity / futures)
- Sale status (active / upcoming / closed)
- Issuer
- Price range

### KYC Required for Details

Full project details (documents, Proof of Reserve feed, legal disclosures) require at least KYC Level 1. Public visitors see summary cards only.

## — CHAPTER 07

# How Investing Works

Cireta operates a regulated token sale mechanism where contributors send USDC to a sale contract during an active sale window. After finalization, tokens are distributed to eligible investors.

**KYC 2**

REQUIRED LEVEL

**USDC**

CONTRIBUTION CURRENCY

**Base**

NETWORK

**<\$0.01**

AVG. GAS FEE

## The Investment Lifecycle

1

**Sale Opens**

The issuer activates a sale window. You can contribute any amount  $\geq$  the minimum during this window.

2

**Contribute USDC**

Send USDC from your registered wallet to the sale contract. Your contribution is locked until finalization or refund.

3

**Sale Finalizes**

Once the target is reached (or the window closes), the issuer finalizes the sale on-chain.

4

**Claim Tokens**

After finalization, click Claim in your portfolio to receive your ERC-3643 security tokens.

5

**Hold or Redeem**

Hold tokens to receive dividends, or submit a redemption request at any eligible redemption window.

**Refund Policy**

If the sale does not reach its minimum target, all contributors can claim a full refund of their USDC. The platform charges no fee on refunded sales.

**⚠ Investment Risk**

Token value may fluctuate with commodity markets. Past performance is not indicative of future results. Only invest what you can afford to lose.

CHAPTER 08

# Direct vs. Vested Sales

Cireta offers two sale types. Direct sales deliver tokens immediately at claim. Vested sales release tokens gradually over a predetermined schedule — often offering a better price in exchange for the lockup period.

OPTION A

Direct Sale

→ Tokens delivered immediately at claim

→ No lockup period

→ Standard market price

→ Full liquidity from day one

→ Suitable for shorter investment horizons

→ Claim available after sale finalization

OPTION B

Vested Sale

→ Tokens released on a schedule (e.g., 25% / quarter)

→ Lockup period defined by issuer

→ Typically discounted token price

→ Encourages long-term holding

→ Suitable for strategic investors

→ Each tranche claimable individually

## Vesting Schedule Example

| Tranche   | Date                         | % Released | Action    |
|-----------|------------------------------|------------|-----------|
| Tranche 1 | 3 months after finalization  | 25%        | Claimable |
| Tranche 2 | 6 months after finalization  | 25%        | Pending   |
| Tranche 3 | 9 months after finalization  | 25%        | Pending   |
| Tranche 4 | 12 months after finalization | 25%        | Pending   |

Claiming Vested Tranches

When a vesting tranche becomes claimable, you will see a **Claim** button appear in your Portfolio → Vesting tab. Each tranche must be claimed individually. Unclaimed tranches accumulate — they do not expire. Gas fees on Base are minimal (typically < \$0.01 per claim).

## CHAPTER 09

# Your Portfolio

The Portfolio page gives you a complete view of your token holdings, vesting schedules, pending contributions, and historical activity all in one place.

## Portfolio Tabs

### Holdings

All ERC-3643 tokens currently in your registered wallet(s). Shows token name, quantity, current value, and on-chain contract address.

### Vesting

Upcoming and claimable vesting tranches from vested sale investments. Shows schedule, claimable amount, and claim button.

### Redemptions

Track submitted redemption requests, their status (pending / processing / fulfilled), and the USDC value expected.

## Portfolio Summary

The summary bar at the top shows:

- Total portfolio value in USDC
- Number of active positions
- Pending vesting value
- Total dividends received

### Real-Time Prices

Portfolio values are updated using live Chainlink Proof of Reserve price feeds for each commodity. Prices refresh every 12 seconds aligned with Base block time.

## — CHAPTER 10

# Dividends & Distributions

Some tokenized assets generate revenue — from storage leasing, futures roll yield, or commodity-backed income streams. Issuers may distribute this income to token holders in the form of USDC dividends.

## How Dividends Work

The issuer deposits USDC into the token's dividend contract. Distributions are proportional to your token holdings at the snapshot date.

## Snapshot Date

A snapshot is taken on the declared record date. Only holders with tokens in their registered wallet at that block are eligible for the distribution.

## Claiming Dividends

After the distribution is declared, navigate to Portfolio → Holdings → select the token → Claim Dividends. USDC is sent to your registered wallet.

## Dividend Eligibility Rules

- Tokens must be in a **registered and KYC-approved** wallet at the snapshot block
- Tokens held in unregistered wallets are **not eligible**
- Vested but **unclaimed** tokens do not qualify — only delivered tokens in your wallet
- Compliance-frozen wallets are excluded from distributions

## Dividend Notifications

You will receive an email notification when a new dividend is declared for a token you hold. A banner will also appear on your portfolio dashboard. Dividends do not expire, but we recommend claiming promptly.

## ① Tax Considerations

Dividend income from tokenized assets may be subject to tax in your jurisdiction. Cireta provides a transaction history export (CSV) from your account settings to assist with tax reporting. Consult a qualified tax advisor for guidance specific to your situation.

CHAPTER 11

# Redemptions

Redemption allows you to exchange your security tokens for USDC at the current Chainlink-priced NAV. Redemptions are subject to the issuer's redemption windows and liquidity availability.

- 1

**Check Redemption Window**  
Each token project defines redemption windows (e.g., quarterly). Check the project page for the next available window.
- 2

**Submit Request**  
Navigate to Portfolio → Redemptions → New Request. Enter the number of tokens to redeem. Requires KYC Level 2.
- 3

**Issuer Review**  
The issuer reviews and processes your request. Status will update to Processing within the declared settlement period.
- 4

**Token Burn & USDC Transfer**  
Your tokens are burned on-chain. USDC is transferred to your primary registered wallet at the settlement NAV price.

## Redemption Status Codes

| Status     | Meaning                                    |
|------------|--------------------------------------------|
| Pending    | Submitted, awaiting issuer action          |
| Processing | Issuer confirmed, settlement in progress   |
| Fulfilled  | USDC transferred, tokens burned            |
| Rejected   | Insufficient liquidity or compliance block |

### Important Notes

- Partial redemptions are supported
- Settlement typically takes 3–5 business days
- NAV price is locked at request submission
- Platform fee (if applicable) deducted from USDC payout

### ⚠ Vested Tokens

You cannot redeem tokens that are still locked in a vesting schedule. Only fully delivered (claimed) tokens are eligible for redemption.

## CHAPTER 12

# Account Settings

Manage your profile, security, notifications, and data exports from the Account Settings section, accessible via your profile icon in the top-right navigation.

## Profile

Update your display name and email address. Email changes require re-verification. Your email is used for all platform communications.

## Password

Change your password at any time. Requires confirmation of your current password. All active sessions are invalidated on password change.

## Notifications

Configure email alerts for: sale openings, KYC updates, dividend declarations, vesting releases, and redemption status changes.

## Data Export

Download your complete transaction history as a CSV file. Useful for tax reporting and personal record-keeping.

## Session Management

Under Account → Sessions you can view all active login sessions (device, browser, IP, last activity) and remotely terminate any session you don't recognise.

### ⚠ Unrecognised Sessions

If you see a session you did not create, terminate it immediately and change your password. Contact support if you suspect unauthorised access.

## Privacy & Data Rights

Under GDPR and applicable data protection law, you have the right to:

- Access all personal data held about you
- Request correction of inaccurate data
- Request deletion (subject to compliance obligations)
- Data portability (CSV export)

Submit requests to [privacy@cireta.com](mailto:privacy@cireta.com)

## — CHAPTER 13

# Security Best Practices

Protecting your account and wallet is your responsibility. Follow these guidelines to keep your investments safe.

## Account Security

### 🔑 Use a Strong Password

At least 12 characters, mixed case, numbers, and symbols. Use a dedicated password manager (1Password, Bitwarden) rather than browser-saved passwords.

### ✉️ Protect Your Email

Your email is the recovery mechanism for your account. Enable two-factor authentication (2FA) on your email provider. Use a dedicated email address for crypto accounts.

### 🔒 Verify Sessions

Regularly review active sessions in Account Settings. Log out of sessions you don't recognise. Always log out on shared or public computers.

## Wallet Security

### 📖 Seed Phrase is Sacred

Write your seed phrase on paper and store it in a secure physical location (safe, safety deposit box). Never store it digitally — no photos, no cloud, no email.

### 🛡️ Consider a Hardware Wallet

For significant holdings, use a hardware wallet (Ledger, Trezor). These keep your private key offline and require physical confirmation for every transaction.

### 🔍 Verify Every Transaction

Always read transaction prompts in your wallet carefully. Verify the contract address and amount before signing. Cireta will never ask you to approve unexpected transactions.

### ⚠️ Phishing Warning

Cireta will NEVER contact you asking for your password, seed phrase, or private key. We will NEVER DM you on Telegram, Discord, or social media offering investment opportunities. If anyone claiming to be Cireta staff asks for sensitive information, report it immediately to [security@cireta.com](mailto:security@cireta.com).

## — CHAPTER 14

# Frequently Asked Questions

Answers to the most common investor questions. Part 1 of 2.

**Q1. What is a security token and how is it different from a cryptocurrency?**

A security token is a blockchain-based digital asset that represents ownership or rights in a real-world asset (in Cireta's case, physical commodities). Unlike cryptocurrencies such as Bitcoin or Ether, security tokens are regulated financial instruments subject to securities law and require investor KYC. They use the ERC-3643 standard which enforces compliance rules at the smart-contract level.

**Q2. Which countries can invest on Cireta?**

Cireta accepts investors from most jurisdictions, subject to local securities law. Residents of sanctioned countries (OFAC list) and certain restricted jurisdictions are not eligible. The platform enforces this at the KYC screening stage via Sumsb's AML/sanctions database.

**Q3. How long does KYC take?**

Automated KYC typically completes in 1–3 minutes via the Sumsb widget. Cases requiring manual review take 24–48 hours. You will receive an email notification when your status changes.

**Q4. What currency do I use to invest?**

All contributions are made in USDC (USD Coin) on the Base network. You will need USDC in your registered wallet before contributing to any sale. USDC can be acquired on centralised exchanges (Coinbase, Binance) and bridged to Base.

**Q5. Are there minimum or maximum investment amounts?**

Each sale defines its own minimum contribution (visible on the sale page). There is typically no platform-wide maximum, but individual issuers may set per-investor caps for regulatory compliance. Minimum investments typically range from \$50 to \$500 USDC.

**Q6. Can I transfer my tokens to another wallet?**

ERC-3643 security tokens can only be transferred between wallets that are KYC-approved and whitelisted on the token's on-chain identity registry. You cannot freely transfer tokens to arbitrary addresses — the compliance layer will reject the transaction.

**Q7. What happens if the sale doesn't reach its target?**

If the sale does not reach its minimum funding threshold, the issuer will mark it as failed and all contributors may claim a full refund of their USDC contribution. No fees are charged on failed sales. Refunds are available immediately after the sale is marked as failed.

**Q8. How is the token price determined?**

Token prices are set by the issuer at sale creation, reflecting the underlying asset's market value. After the sale, token NAV is tracked via Chainlink Proof of Reserve price feeds, which are updated on-chain at regular intervals. Redemption prices use the Chainlink price at the time of request.

## — CHAPTER 15

# Frequently Asked Questions

Answers to common investor questions. Part 2 of 2.

**Q9. What is Proof of Reserve and why does it matter?**

Proof of Reserve (PoR) is an on-chain attestation that the physical commodity backing the token actually exists and is held in a verified vault. Cireta integrates Chainlink PoR feeds so investors can independently verify that the issued token supply is fully backed at any time.

**Q10. What fees does Cireta charge?**

Platform fees are set per-issuer and are visible on each project page before you invest. Fees are charged as a percentage of the raise (default 2%, or 200 basis points). There are no additional hidden fees. Gas fees on Base are minimal — typically under \$0.01 per transaction.

**Q11. Can my wallet be frozen and why?**

Yes, wallets can be frozen by the issuer or platform compliance team if there is a regulatory requirement (e.g., court order, sanctions screening hit, AML investigation). Frozen wallets cannot receive, transfer, or redeem tokens until unfrozen. You will be notified if this occurs and may appeal through legal channels.

**Q12. How do I claim my tokens after a sale finalizes?**

After finalization, a Claim button appears in your Portfolio for the relevant sale. Click it, confirm the transaction in your wallet, and tokens will be transferred to your primary registered wallet. Claiming requires a small gas fee paid in ETH on Base (typically < \$0.01).

**Q13. What if I lose access to my registered wallet?**

If you lose access to your wallet, the issuer has a compliance-controlled recovery mechanism. Contact support with proof of identity. The issuer can use a forced transfer (on-chain) to recover your tokens to a new wallet, following their compliance process. This is why keeping your seed phrase safe is critical.

**Q14. Are security tokens tradeable on exchanges?**

ERC-3643 tokens can only be traded on regulated security token exchanges that integrate with ONCHAINID for compliance. They cannot be listed on standard DEXes (Uniswap, etc.) as the smart contract enforces transfer restrictions. Cireta may announce secondary market partnerships in the future.

**Q15. How do I report a problem or dispute?**

Use the in-app Help & Support section or email [investor-support@cireta.com](mailto:investor-support@cireta.com). For compliance-related matters, contact [compliance@cireta.com](mailto:compliance@cireta.com). For urgent security issues, email [security@cireta.com](mailto:security@cireta.com). All disputes are logged and tracked with a ticket reference number provided by return email.

## — CHAPTER 16

# Glossary A–L

Key terms used throughout the Cireta platform and this guide.

**AML (Anti-Money Laundering)**

Regulatory framework requiring financial institutions to detect and prevent the proceeds of crime from entering the financial system.

**Base**

An Ethereum Layer 2 (L2) blockchain developed by Coinbase. Provides fast, low-cost transactions secured by Ethereum's mainnet.

**Chainlink PoR**

Chainlink Proof of Reserve — decentralised oracle network data feed confirming that a tokenized asset is backed by real-world reserves.

**Compliance Freeze**

A regulatory action that prevents a wallet from transferring or receiving security tokens. Enacted by the issuer or platform in response to legal requirements.

**ERC-3643**

An Ethereum token standard for compliant security tokens. Enforces transfer restrictions and identity verification at the smart-contract level.

**Forced Transfer**

A compliance action allowing an issuer to move tokens from one address to another, typically used for wallet recovery or regulatory orders.

**Gas Fee**

A small fee paid in ETH to the Base network to process a blockchain transaction. On Base, gas fees are typically under \$0.01.

**Identity Registry**

An on-chain smart contract that maintains the list of KYC-approved wallet addresses permitted to hold a given security token.

**IPFS**

InterPlanetary File System — a distributed storage protocol. Cireta stores legal documents and token prospectuses on IPFS for immutable public access.

**Issuer**

A regulated legal entity that creates and manages tokenized assets on the Cireta platform. Issuers undergo their own KYB (Know Your Business) verification.

**JWT (JSON Web Token)**

A cryptographically signed token used for authentication. Cireta uses short-lived access JWTs (15 minutes) with rotating refresh tokens (7 days).

**KYC (Know Your Customer)**

The process of verifying the identity of an investor. Required by law for regulated securities platforms. Cireta uses Sumsub for KYC processing.

**Layer 2 (L2)**

A secondary blockchain built on top of Ethereum that processes transactions faster and cheaper while inheriting Ethereum's security guarantees.

**Liveness Check**

A brief video selfie performed during KYC to confirm that the person submitting documents is physically present and matches the provided ID.

## — CHAPTER 17

# Glossary M–Z

Continued glossary of key platform terms.

**NAV (Net Asset Value)**

The value per token calculated from the current market price of the underlying commodity, divided by total token supply. Used for redemption pricing.

**ONCHAINID**

A decentralised identity standard on Ethereum. Cireta uses ONCHAINID to bind KYC approval to a wallet address on-chain, enabling compliant token transfers.

**Proof of Reserve (PoR)**

On-chain attestation via Chainlink that the physical asset backing a token is held in custody. Investors can verify the reserve amount independently.

**RWA (Real World Asset)**

Any tangible or financial asset from the traditional world — gold bullion, copper, real estate, bonds — that has been tokenized on a blockchain.

**Sale Contract**

An audited smart contract deployed by the issuer that holds USDC contributions during a token sale and enforces fundraising rules on-chain.

**Security Token**

A blockchain-based token that is classified as a financial security under applicable law. Subject to regulatory oversight and investor protection rules.

**Sumsb**

The KYC/AML verification provider used by Cireta. Sumsb processes identity documents, performs liveness checks, and screens against sanctions lists.

**Token Claim**

The action of retrieving your purchased tokens from the sale contract to your wallet after a sale finalizes. Requires a small gas fee on Base.

**Token Symbol**

A short ticker code identifying a security token (e.g., CGLD for Cireta Gold). Used in portfolio displays and on-chain logs.

**Tranche**

A portion of vested tokens that becomes claimable at a specific date in a vesting schedule. Each tranche must be claimed individually.

**USDC**

USD Coin — a fully regulated, dollar-pegged stablecoin issued by Circle. Used as the contribution and settlement currency on the Cireta platform.

**Vesting Schedule**

A predetermined token release timeline for vested sale investors. Tokens unlock in tranches over time, incentivising long-term holding.

**WalletConnect**

An open-source protocol for connecting crypto wallets to web applications. Cireta supports WalletConnect v2 for wallet integration.

**Whitelist**

The on-chain list of KYC-approved wallet addresses permitted to hold a security token. Only whitelisted addresses can receive, hold, and transfer the token.

CHAPTER 18

# Support & Contact

The Cireta team is here to help. Use the appropriate channel below for your query to receive the fastest response.

**General Investor Support**  
[investor-support@cireta.com](mailto:investor-support@cireta.com)

Account issues, investment questions, portal navigation, KYC queries. Response within 1 business day.

**Compliance & Legal**  
[compliance@cireta.com](mailto:compliance@cireta.com)

Wallet freeze enquiries, regulatory questions, dispute resolution, identity correction requests.

**Security Incidents**  
[security@cireta.com](mailto:security@cireta.com)

Suspected unauthorised access, phishing reports, security vulnerabilities. Treated as high priority.

**Privacy & Data**  
[privacy@cireta.com](mailto:privacy@cireta.com)

GDPR data access requests, data deletion, privacy policy questions, PII corrections.

## In-App Help

The quickest way to get help is via the **Help & Support** section inside the launchpad portal. You can:

- Browse the searchable knowledge base
- Submit a support ticket with automatic priority routing
- Track your open tickets and view responses
- Access video tutorials for common workflows

## Response Times

| Channel                                                  | Target Response            |
|----------------------------------------------------------|----------------------------|
| In-app ticket                                            | 4–8 business hours         |
